

TRAIN-THE-TRAINER COURSES

OUR TRAIN-THE-TRAINER PROGRAM

OSHA requires all operator training and evaluation shall be conducted by persons who have the knowledge, training, and experience to train powered industrial truck operators and evaluate their competence.

ANSI Standards state that one who, by possession of a recognized degree, certificate, or professional standing, or by extensive knowledge, training, and experience, has successfully demonstrated his/her ability to solve or resolve problems related to the subject matter, the work, or the project.

OUR TRAIN-THE-TRAINER COURSES

During our Train-the-Trainer Courses, you will be educated on how to prepare for your formal instruction portion of your training classes, all OSHA/ANSI requirements and how to conduct a practical training session. You will also receive a Trainer's Guide and flash drive in which will assist you in creating your own company compliant training course. Certification documentation is included as well to certify your employees to operate Powered Industrial Lift Trucks/ Mobile Elevated Work Platforms. This is a 2-part course that includes classroom and practical portions.

Our classroom portion consists of PowerPoint presentations, class discussion, along with video viewing and practical activities.

For the Train-the-Trainer practical portion of the class you are required to set up and demonstrate your ability to teach others the practical use of lift trucks or Mobile Elevated Work Platforms. As well as utilizing pre-use/pre-start inspections, simulated driving procedures and load handling that complies with all OSHA/ANSI standards & regulations.
